Transforming Education Together

Max Ventilla, AltSchool Founder & CEO
The world is getting bigger and bigger

Change is
The power of technology is increasing exponentially.
3 Mental work is becoming increasingly free
We must teach empathy and creativity to prepare children for future jobs.
Students’ engagement in school plummets over time
By the end of the 20th century, industrial education reached its limits.

Computers can’t teach kids to think in ways that a computer can’t
Industrial Model \rightarrow \text{Learner-Centered Model} \\
\text{Supported by Technology}
Industrial Model ➔ Learner-Centered Model

Supported by Technology

Great learning is messy
ALTSCHOOL'S MISSION AND VISION

Make the best education the most available to enable all children to achieve their potential
Educators and technologists working together

Educators collaborate with designers, researchers, and engineers to deeply understand learners and to continually improve our product design and platform.

Helping schools transform to learner-centric
A diverse network of schools on a common platform

PARTNER STORY

Odyssey STEM Academy

SOCIALLY EMBEDDED
Schools need better support.
Schools need better support.
And better collaboration.
Thank you

Make the best education the most available to enable all children to achieve their potential
